

I completely oppose petition 04-160. We do not need more regulations and restrictions of contents and services that we (the subscribers) PAY for. XM and Sirius satellite radio are a refreshing alternative to the mindless dribble that is being broadcast for "FREE" in our cities. I, for one, CHOOSE to pay a subscription fee to hear XM radio. I value the service, the variety, and the local information offered to me here in Los Angeles, I.E. the local traffic and weather. Satellite radio is an EXCELLENT service unlike terrestrial FM broadcasting as it has become. On this note, I was taught to think that the national language here is english, not spanish. I like my local traffic and weather in ENGLISH, and up to the minute without 20 minutes of commercial time. XM provides this for me. I am sick of big business trying to ram whatever they choose down the consumers throats, and trying to change the laws when their free service is threatened by something that people such as myself are willing to pay for.

This is still the United States of America. We are entitled to a choice. I have made mine. XM has my vote. Leave Satellite radio alone.

Thank you.
